

Star Suite is a multi vendor/domain OSS/BSS solution which focuses telco network observability. Many features are provided such as topology management, fault management, performance management and etc.

Why does Star Suite make difference?

- It is a specific telco solution
- Offers integrated tools in a single platform unlike its equivalents
- Delivers live events and analyses, on the fly impact over network
- Accuracy is 99% satisfied on vertical services

What are the benefits/impacts on costs?

- Dramatical decrement on OPEX and CAPEX
- Less employee requirement thanks to automated processes
- Less time and effort for daily operations

Deployment Models

- On Premise (Virtual or Physical Servers)
- On Premise Cloud (Kubernetes, OpenShift and etc.)
- Cloud
- Multi-Cloud

Business Models

- Lifetime Upgrade with Annual License Fee (w/o CR)
- Level-3 Support
- No additional 3rd party license fee is required
